01 Brand Positioning Framework

Element	Answer
Category	AI-native fractional CMO *(new category)*

Element	Answer
Audience	B2B SMB founders, $500k–$10M revenue, no in-house marketing leader, feeling “invisible” in AI search
Pain	“My site doesn’t show up in ChatGPT. My agency costs $8k/mo and moves slow. I can’t afford a real CMO. My marketing is fragmented.”
Promise	“One retainer covers strategy, software, and full execution — tuned for the AI search era.”
Proof	12 AI agents, proprietary AEO methodology, transparent pricing, 50-state coverage, published case studies, Stripe + Mercado Pago, productized tiers
Emotional outcome	“I stopped worrying about marketing. I sleep better.”
Functional outcome	“We get cited by AI engines, close more deals, and cut marketing spend 40%.”

ONE-LINER

“The only fractional CMO that builds your AI-search presence while you sleep.”

02 Messaging Hierarchy

Pillar 1 — "AEO beats SEO now"

- ChatGPT now drives 12% of US informational search traffic (Similarweb, Q1 2026)
- Our clients average 4.2× more AI engine citations vs baseline
- We published the AEO playbook read by 8,000+ marketers

Pillar 2 — "One price, one retainer"

- Bundled: CMO + CRM + content + outbound in one invoice
- Transparent tiers ($249 / $999 / $2,499) — no scope games
- Fewer vendors = faster execution (ship in week 1, not month 3)

Pillar 3 — "AI does the grind, humans lead the strategy"

- 12 named AI agents each own a marketing function
- Carlos leads strategy on every account — no junior AE swaps
- 4× output per dollar vs traditional agency (measured per-client)

PRE-FLIGHT BLOCKER

Meta Pixel loader is now gated across all customer-facing pages (`window.NWM_META_PIXEL_ID` defaults to empty; loader no-ops until set). Inject the real Pixel ID before any paid spend launches — otherwise there is no conversion attribution.

2	30	"The Growth tier: what you'd unlock (paid ads, weekly calls, email nurture)"	See Growth scope

Dashboards to build in Looker Studio (4 boards)

Board	Audience	Refresh	Key widgets
Pipeline & Revenue	Carlos daily	Hourly	MRR, new MRR, churned MRR, pipeline coverage ratio, % to plan
Channel performance	CMO weekly	Daily	CAC by channel, LTV:CAC, payback, MQL→SQL→Won funnel
Content / AEO	content-strategist weekly	Daily	LLM citations (ChatGPT, Claude, Perplexity), organic visits, MQLs per post
Operations	Carlos weekly	Daily	NPS, CSAT, time-to-first-value, onboarding completion %, churn risk score

Review cadence

- Carlos checks Pipeline & Revenue board
- CMO + Carlos walk all 4 boards; decide one cut, one double-down

- Full retro vs forecast; update scenario position (bear/base/bull)
- Strategic review; reallocate channel budgets; refresh competitive battlecards

11 Funnel Assumptions (Month 12 target)

Stage	Monthly volume	Conversion
Website visitors	40,000	—
Free audit / trial requests	1,200	3%
Sales-qualified leads (SQL)	180	15%
Platform sign-ups ($49–$449)	35/mo	19% of SQL
Retainer closes ($249+)	13/mo *(revised up from 6 to hit MRR target at lower ACV — see business plan §8 strategic note)*	7.2% of SQL

12 Brand Guardrails (marketing-facing)

- No public discounts below list. The “Carlos26” launch promo was retired on 2026-04-21.
- No sub-$500k revenue clients. Below the brand.
- Partners whitelabel the software, not the NetWebMedia agency brand.
- All marketing follows the Gulf-Oil palette (Navy `#010F3B` / Orange `#FF671F` / Blue `#4A90D9`) — see Brand Book.
- Bilingual by default for LATAM — not translation, localization (voice/tone shifts).

- Every claim ("4.2× citations", "40% cost cut") ties to a published case study or data study. No manufactured proof.

13 90-Day Success Criteria (roll-up)

UNDER REVIEW AFTER THE 2026-04-21 REPRICING

Keeping the $32k MRR aim for now, but hitting it requires ~2.2× the original retainer customer count. See business plan strategic note.

Metric	Start (May 4)	End (Jul 31) target
MRR	~$12k	**$32k** *(requires ~80 paying retainer clients at new weighted ARPU, up from 38)*
Paying clients	~14	**80+**
LLM citations tracked	<50	**400+**
Pipeline ($ coverage 60-day)	$35k	**$145k**
CAC (blended)	~$3,200	**<$800** *(floor dropped with ACVs)*
Organic visits/mo	8k	**28k**
Partners signed	0	**25**

CLOSING NOTE FROM THE CMO

The plan is front-loaded on content + outbound because those are the only channels where our AI-agent stack creates unfair cost leverage in Q1. Paid media and partners scale later once we have proof assets (case studies + data studies) to fuel them.

Bear-case pivot trigger: If by July 31 we're below $20k MRR — pause Lite tier acquisition and concentrate demand on Growth + Scale + CRM $449. Don't wait to pull that lever. *(Threshold lowered from $28k after 2026-04-21 repricing.)*
