DOCUMENT 04 · IDENTITY

Brand Book

The Gulf-Oil-inspired identity system for NetWebMedia. Voice, color, type, logo, components, and governance. Use this as the single source of truth whenever anyone — human or agent — produces something NetWebMedia-branded.

Creative Director: (AI-native) **Approved by:** Carlos Martinez (CEO) **Version:** 1.0 — April 21, 2026

01 Brand North Star

Purpose

Democratize Fortune-500 marketing leadership for small and mid-sized businesses by compressing a 10-person department into one AI-native retainer.

Vision (3-year)

Be the default answer when ChatGPT or Perplexity is asked *“how does a small business run marketing with AI?”*

Mission

Help SMB founders stop worrying about marketing — by shipping strategy, software, and execution under one roof, at one transparent price.

Values (operating, not poster)

- Every marketing act must tie to pipeline or trust-building. No activity for activity’s sake.
- Bias to publish. Bias to deploy. Decks don’t move the needle.
- We build our own stack because renting agency margin to SaaS is a dead end.
- English + Spanish is native, not an afterthought.
- We tell clients what’s not working — in week 2, not quarter 2.

BRAND PROMISE

“One retainer. AI + human. You stop worrying about marketing.”

02 Brand Personality

We are

Adjective	Rationale
Direct	We say the thing. No hedging, no “perhaps consider.” Clients are busy.
Fast	Days, not weeks. Week-one deployment is a feature.
Confident	We’ve done the work. We don’t need to over-explain.
Technical	We name the stack. Internally we run on Claude Pro Max (Anthropic) — that’s our thinking engine. Externally we optimize for the answer engines our clients’ buyers use (ChatGPT, Perplexity, Google AI Overviews) and integrate with the tools we deploy (GHL, GA4, HubSpot, Stripe, Mercado Pago). Naming the stack separates us from agencies that say “AI” as a buzzword.
Bilingual	Tone shifts fluidly between US and LATAM voices.
Performance-minded	Speed, clarity, conversion. The Gulf livery is not accidental.

We are NOT

Anti-adjective	Rationale
Fluffy	No “digital transformation journey” language. If the words could appear in a 2015 Accenture deck, rewrite them.
Hype-y	No “revolutionary” or “game-changing.” We prove with data, not adjectives.
Apologetic	We don’t soften our differentiators. We believe we’re right.
Corporate	We’re a one-operator agency with AI staff. Sound like it.
Slow	If a sentence can be shorter, it is shorter.
Generic-startup	No purple gradients, no lab-coat astronauts, no clichéd “we’re disrupting X” positioning.

03 Voice & Tone

Five voice principles

1. Sentences earn their space

DO

"Your site doesn't show up in ChatGPT. Here's the fix."

DON'T

"In today's rapidly evolving digital landscape, it's more important than ever to ensure that your brand has visibility across emerging AI-powered discovery channels."

2. Specific over clever

DO

"847 ChatGPT citations in 90 days."

DON'T

"Unleash the power of AI citations."

3. Price tags without squirming

DO

"$249/month. No setup fee."

DON'T

"Contact us for pricing tailored to your needs."

4. First-person plural, rarely first-person singular

DO

"We shipped 847 citations in 90 days."

DON'T

"I founded NetWebMedia to bring enterprise marketing to SMBs."

Exception: Carlos bylines. Personal essays use *I*.

5. Humor is OK if it's true

DO

"We asked ChatGPT about your niche. It has never heard of you."

DON'T

"LOL marketers be like 😂"

Tone shifts by context

Context	Tone	Example opener
Sales page	Confident, specific, numeric	"Get cited by ChatGPT, Perplexity, and Google — starting at $249/mo."
Blog article	Analytical, data-first, occasionally sharp	"We pulled 1,000 ChatGPT citations. Here's what actually moves rankings."
Customer email	Direct, warm, brief	"Your Q1 results are in. Quick read, one decision needed."
Error message	Plain, ownership, no jargon	"That didn't work. We logged it. Here's what to try next."
Social post	Observational, one-line hooks	"HubSpot is $3,600/mo. Then you hire an agency. Make it make sense."

04 Messaging Architecture

Tagline

"The AI-Native Fractional CMO."

- "Get cited by AI. Close more deals."

- “One retainer. Strategy + software + execution.”
- “Stop worrying about marketing.”

Elevator pitches

10 SECONDS

“NetWebMedia is an AI-native fractional CMO for US and LATAM SMBs. Strategy, software, and full execution in one retainer — starting at $249 a month.”

30 SECONDS

“NetWebMedia gives $1M–$20M businesses what they usually can’t afford: a CMO-grade marketing system. We handle strategy, build the automations, run the campaigns, and produce the content — using AI at every layer to do the work of a five-person team. One monthly retainer, no agency markup chaos, fully transparent reporting. We’re bilingual — serving US brands and LATAM businesses growing in the US market.”

60 SECONDS

“Most SMBs are spending $2,000–$5,000 a month on fragmented agency services — an SEO vendor, a social media freelancer, a paid ads person — with no one connecting the dots. Meanwhile, large brands have CMOs coordinating all of it. We built NetWebMedia to close that gap using AI. We serve businesses doing $1M to $20M in revenue that don’t have a CMO. We become their CMO. We deliver the strategy, build and manage the software stack — CRM, automations, AI agents, content systems — and we run the campaigns. We’re answer-engine optimized, which means we get our clients cited by ChatGPT, Perplexity, and Google AI Overviews. We are bilingual by design, serving both US and LATAM markets, and our pricing starts at $249 a month for the full package. Think of us as HubSpot’s polish with GoHighLevel’s economics — run by AI, priced for the businesses that actually need it.”

Boilerplate paragraphs

Short (for email signatures, partner bios)

> *NetWebMedia is an AI-native fractional CMO for US and LATAM SMBs. We deliver strategy, software, and full-execution marketing — AI agents, CRM automation, paid ads, SEO, and content — in one monthly retainer starting at $249/mo. Bilingual EN/ES.*

Medium (for PR, speaker bios)

> *NetWebMedia is an AI-native marketing agency that replaces an 8-person marketing department with one productized retainer. Run by CEO Carlos Martinez and powered by 12 AI agents, NetWebMedia delivers strategy, owned software (CRM, CMS, Video Factory, AEO engine), and full execution — all tuned for the AI search era. Clients average 4.2× more citations across ChatGPT, Claude, and Perplexity within 90 days. Pricing: $249 / $999 / $2,499 monthly (repriced 2026-04-21). Bilingual EN/ES. US + LATAM.*

05 Color System

Primary palette (Gulf-Oil inspired)

NWM Navy Dark `#010F3B`	**NWM Navy** `#012169`	**NWM Navy Mid** `#01306E`	**NWM Orange** `#FF671F`
NWM Orange Light `#FF8C42`	**NWM Blue** `#4A90D9`		

Neutrals

White
#FFFFFF

Text Secondary
#C8D4E6

Text Muted
#7B8FAD

Semantic layer

Success
#22C55E

Warning
#F59E0B

Error
#EF4444

Info
#4A90D9

Usage rules

Color	Use for	Do NOT use for
NWM Navy Dark `#010F3B`	Primary backgrounds, headers, dark surfaces	Body text (too close to black on dark screens)
NWM Orange `#FF671F`	CTAs, accents, hover states, data highlights	Body paragraphs, long-form text blocks
NWM Blue `#4A90D9`	Secondary accents, info callouts, links on light bg	Primary CTAs (that's Orange's job)
White `#FFFFFF`	Primary body text on navy, reversed logo	Large flat fills — dilutes the dark brand

Pairing rules

- Orange CTAs live on Navy Dark backgrounds. This is the signature look.
- Never pair Orange and Blue as equal weights — one must be accent, one must be primary.
- Keep Orange under 20% of any composition. More than that, and it stops being an accent.
- Gradients: use `linear-gradient(135deg, #FF671F 0%, #FF8C42 40%, #4A90D9 100%)` for hero moments only. Never on small UI.

Accessibility contrast

Pair	Ratio	WCAG 2.2
White on NWM Navy Dark	17.12:1	AAA
Orange on NWM Navy Dark	5.94:1	AA LARGE + NORMAL
Orange on White	3.24:1	AA LARGE ONLY
Blue on NWM Navy Dark	5.21:1	AA
Text Secondary `#C8D4E6` on Navy Dark	12.84:1	AAA

06 Typography System

Fonts

Poppins (weights: 500, 600, 700, 800)
Inter (weights: 400, 500, 600, 700)
JetBrains Mono (data tables, code, metrics)

Loaded from Google Fonts with `display=swap`. Preload the 4 weights actually used; don't ship 9 weights.

Type scale

Poppins 800 / line-height 1.05 / letter-spacing -0.03em / Use: hero headline only

Poppins 800 / line-height 1.1 / letter-spacing -0.025em / Use: page titles

Poppins 700 / line-height 1.2 / letter-spacing -0.02em / Use: section titles

Poppins 700 / line-height 1.3 / letter-spacing -0.01em / Use: sub-sections

Inter 400 / line-height 1.6 / Use: leads, hero descriptions

Inter 400 / line-height 1.7 / Use: default body

Small 13px — captions, metadata, timestamps, legal disclaimers.

Inter 500 / line-height 1.5 / Use: captions, metadata

Pairing rules

- Display face (Poppins) only on H1–H3. Never set body in Poppins.
- Inter handles everything from H4 down to captions.
- Don't bold body text mid-paragraph to "emphasize" — use it for scannable keywords only, sparingly.

07 Logo Usage

NetWebMedia.

Canonical logo files: `assets/images/netwebmedia-logo-lockup.png` *(horizontal) and* `assets/images/nwm-logo.svg` *(mark).*

Clear space

Minimum clear space around the logo = the height of the lowercase “n” on all four sides. Never let anything cross that boundary.

Minimum sizes

- 120px wide (lockup), 32px wide (mark)
- 1 inch wide (lockup), 0.5 inch (mark)

Approved color versions

- Full color — Navy + Orange — on white or light cream backgrounds
- Reversed — White + Orange — on NWM Navy Dark or any dark photograph
- Monochrome — All Navy or All White — for single-color print or favicons

Six misuse “don’ts”

1. Don’t stretch or distort proportions.
2. Don’t recolor outside the approved palette.
3. Don’t place on busy photography without a backing panel.
4. Don’t rotate more than 0°.
5. Don’t add drop shadows, outer glows, or bevels.
6. Don’t re-typeset the wordmark in a different font.

08 Iconography

Lucide. 1,400+ icons, stroke-only, consistent weight, active maintenance.

Phosphor’s thin/bold/duotone variants create inconsistency when multiple contributors touch it. Heroicons is too small a library. Lucide is boring in the best way.

Usage rules

- Stroke width: 1.5 (default), 2 for emphasis only
- Standard size: 20px UI, 24px feature, 16px inline
- Color: match text color or use `--nwm-orange` for accent
- Never mix icon libraries in the same screen

09 Photography & Imagery

Direction

This is the only photography style that integrates cleanly against a `#010F3B` navy backdrop without heavy retouching.

What works

- Low-key portraits with a single strong edge light (product-hero feel)
- Desk + device compositions shot in shadow, not flat-lay overhead daylight
- Abstract motion blur (car livery, track photography) — references Gulf heritage without being on-the-nose

What doesn't

- Bright lifestyle stock (laptop + coffee, diverse-team-around-whiteboard)
- Handshake metaphors, arrow-hitting-bullseye metaphors, hooded-hacker metaphors
- Any image with its own dominant color palette that fights the brand palette

AI-generated imagery (Midjourney, fal, Ideogram)

Prompt seeds that fit:

- `…, cinematic rim-light, single key, navy backdrop, gulf-orange accent, moody, shallow depth of field, 35mm`
- `…, editorial product shot, dark studio, orange bounce light, sharp focus, Poppins-era minimalism`

Never ship an AI image that shows fake hands, fake text on screens, or fake logos. Zero tolerance.

10 Layout & Spacing

8-point grid

All spacing is a multiple of 8px (sometimes 4px for fine adjustments).

Token	Value	Use
space-1	4px	Tight icon padding, fine-tune
space-2	8px	Between related elements
space-3	12px	Button internal padding
space-4	16px	Card internal padding, stack gap
space-6	24px	Section gap on mobile
space-8	32px	Section gap desktop
space-12	48px	Major section breaks
space-16	64px	Hero-to-first-section gap

Container widths

Breakpoint	Max width
Mobile	100% (24px side padding)
Tablet (720px+)	680px
Desktop (1024px+)	960px
Wide (1280px+)	1200px
XL (1600px+)	1360px (hard cap)

11 Components

Buttons

Book a 15-min Audit

Learn More

- Orange gradient. One per screen. Reserved for the main CTA.
- Glass/outline on dark bg. Neutral “continue” actions.
- Orange text on transparent. Low-weight tertiary actions.

Button sizes: S (32px tall, 13px text), M (40px tall, 14px text — default), L (48px tall, 16px text — hero only).

Cards

EXAMPLE CARD

$1.02M

ARR target, Year 1

HOVER STATE

Lifted

translateY(-2px) + orange border

RADIUS

16px

Medium cards; 24px for hero cards

Callouts

ORANGE — DEFAULT ACCENT CALLOUT

For emphasis, pull quotes, key takeaways.

AMBER — WARNING CALLOUT

For blockers, risks, “before you proceed” notices.

BLUE — INFO/NOTE CALLOUT

For supplementary context, tips, side-notes.

12 Motion

Easing

- `cubic-bezier(0.4, 0, 0.2, 1)` (Material standard)
- `cubic-bezier(0, 0, 0.2, 1)` (decelerate)
- `cubic-bezier(0.4, 0, 1, 1)` (accelerate)

Duration tokens

- — hover, focus, icon swap
- — card lift, modal open
- — section reveal, hero animations

What animates, what doesn’t

- button hover, card lift, modal open, nav scroll shadow, typewriter hero
- body text fading in on scroll (exhausting), parallax images (distracting), icon spinning unless loading

The hero typewriter effect already on the site is canonical. Use it only for the hero subhead — not a page-wide pattern.

Reduced motion

Respect `prefers-reduced-motion`. When set, disable all non-essential animations. Keep focus states, keep essential loading states.

13 Social Media

Platform	Profile image	Cover / banner	Post template
X (Twitter)	NWM mark (orange on navy), 400×400	1500×500, navy gradient + orange bar	Quote-card: navy bg, H2-size quote, orange signature line
Instagram	NWM mark, 320×320	N/A (Story covers 1080×1920)	Carousel: slide 1 hook, 2–6 data, 7 CTA
Facebook	NWM mark, 180×180	1640×924, navy + orange gradient	Same quote-card as X
YouTube	NWM mark, 800×800	2560×1440 (safe area 1546×423)	Thumbnail: split navy/orange, Carlos face left, 4-word hook right
TikTok	NWM mark, 200×200	N/A	Vertical 1080×1920, subtitle in Poppins 700, orange accent bar
LinkedIn	Not active (CEO directive)		

14 Email Templates

Transactional

- Header: NWM wordmark, 32px tall, left-aligned, on navy 60px tall band
- Body: white background, 15px Inter, black text for deliverability
- CTA: Orange button, 48px tall, 20px+ horizontal padding
- Footer: address, unsubscribe if marketing mail, single Lucide icon row for social

Marketing (newsletter)

- Header: can use a hero image (dark, rim-lit) 600×240
- Body: max 600px wide; short paragraphs (2–3 sentences max)
- One primary CTA at the top, one reinforcing at the bottom
- Never more than 3 links total in a marketing email

15 Bilingual & Localization

NetWebMedia is bilingual by default — English for US, Spanish for LATAM. Localization is not translation.

Spanish tone shifts

- LATAM Spanish, not Spain Spanish (*celular*, not *móvil*; *computadora*, not *ordenador*)
- Usted is the default register for business prospects; tú only for startup founders under 35 or in casual social
- Currency: USD everywhere in pricing copy; local currency only in paid ads geo-targeted to a specific country
- Humor translates poorly — the “ChatGPT has never heard of you” line lands in English but needs softening in Spanish

What doesn’t change

The brand voice is *the same person* in both languages: direct, specific, performance-minded. Only the register shifts, not the personality.

16 Accessibility

WCAG 2.2 AA for all marketing pages, AAA for anything compliance-related.

Principles

- If something is “red”, it must also have an icon or label.
- All CTAs, all modals, all nav — Tab, Shift+Tab, Enter, Esc all work.
- 2px orange outline, 2px offset — never remove focus rings.
- Describe what the image conveys, not “image of a laptop.”
- Every Carlos video. No exceptions.

17 Brand Governance

Source of truth

This document. Lives in `/plans/brand-book.html` and the Markdown version at `BRAND.md` in the repo root.

Who approves new brand extensions

- any change to logo, palette, tagline, positioning
- new ad creative, social templates, visual assets

- new voice applications, editorial templates
- within the rules above, no approval needed

White-label / reseller applications

Partners who resell the software can whitelabel . They do NOT whitelabel the NetWebMedia agency brand. Partner co-marketing uses the NWM wordmark + partner logo in a clear “X × NetWebMedia” lockup, never substituting one for the other.
