Sprint Success Criteria

Metric	Bear	Base	Bull
Clients signed	1	3	5
New MRR	\$249	\$2,997	\$4,497
Webinar registrations	20	50	100

Discovery → proposal sent	1	4	8
Niche page UTM conversions	5	20	40

SPRINT PIVOT RULE

If by Day 14 (May 19) webinar registrations are below 20 — shift 100% of outbound effort from Instagram/email to direct LinkedIn DMs via Carlos’s personal profile only (not the

company page). If by Day 21 zero discovery calls are booked — drop price to Starter tier and offer a complimentary 30-day audit as the conversion hook instead.

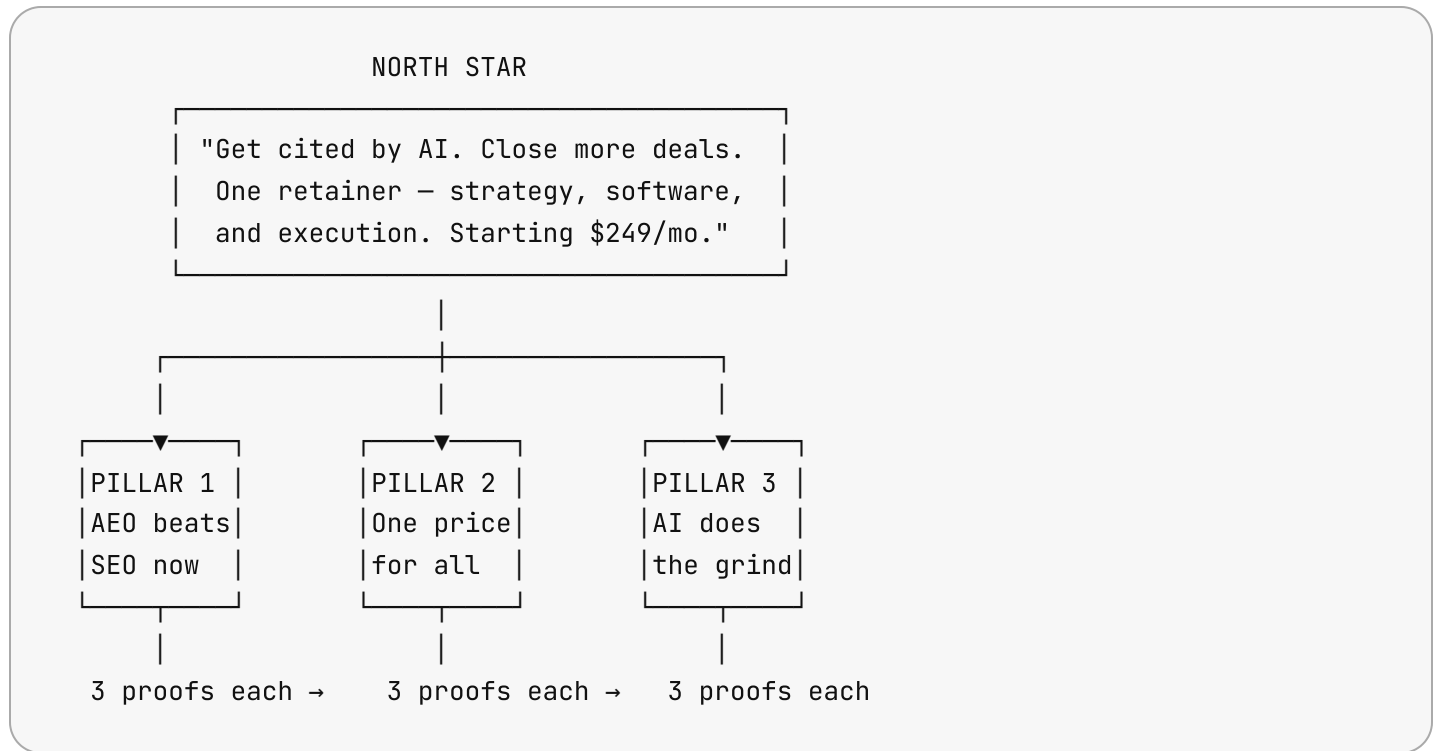

01 Brand Positioning Framework

Element	Answer
Category	AI-native fractional CMO <i>(new category)</i>
Audience	B2B SMB founders, \$500k–\$10M revenue, no in-house marketing leader, feeling “invisible” in AI search
Pain	“My site doesn’t show up in ChatGPT. My agency costs \$8k/mo and moves slow. I can’t afford a real CMO. My marketing is fragmented.”
Promise	“One retainer covers strategy, software, and full execution — tuned for the AI search era.”
Proof	12 AI agents, proprietary AEO methodology, transparent pricing, 50-state coverage, published case studies, Stripe + Mercado Pago, productized tiers
Emotional outcome	“I stopped worrying about marketing. I sleep better.”
Functional outcome	“We get cited by AI engines, close more deals, and cut marketing spend 40%.”

ONE-LINER

“The only fractional CMO that builds your AI-search presence while you sleep.”

02 Messaging Hierarchy

Pillar 1 — “AEO beats SEO now”

- ChatGPT now drives 12% of US informational search traffic (Similarweb, Q1 2026)
- Our clients average 4.2× more AI engine citations vs baseline
- We published the AEO playbook read by 8,000+ marketers

Pillar 2 — “One price, one retainer”

- Bundled: CMO + CRM + content + outbound in one invoice
- Transparent tiers (\$249 / \$999 / \$2,490) — no scope games
- Fewer vendors = faster execution (ship in week 1, not month 3)

Pillar 3 — “AI does the grind, humans lead the strategy”

- 12 named AI agents each own a marketing function
- Carlos leads strategy on every account — no junior AE swaps

- 4× output per dollar vs traditional agency (measured per-client)

Meta Pixel loader is now gated across all customer-facing pages

(`window.NWM_META_PIXEL_ID` defaults to empty; loader no-ops until set). Inject the real Pixel ID before any paid spend launches — otherwise there is no conversion attribution.

ALIGNED TO 90-DAY STARTER UPGRADE CREDIT

Triggered the day a fCMO Starter contract is signed. Goal: convert Starter clients to Growth/Premium within the 90-day window when the Starter credit is active. Starter is designed as a wedge, not a revenue pillar — Premium clients are worth ~17× a Starter client per cohort data.

#	Day	Subject	CTA
1	14	"Your first 2 weeks: here's what we learned"	View audit findings
2	30	"The Growth tier: what you'd unlock (paid ads, weekly calls, email nurture)"	See Growth scope

Dashboards to build in Looker Studio (4 boards)

Board	Audience	Refresh	Key widgets
Pipeline & Revenue	Carlos daily	Hourly	MRR, new MRR, churned MRR, pipeline coverage ratio, % to plan
Channel performance	CMO weekly	Daily	CAC by channel, LTV:CAC, payback, MQL→SQL→Won funnel

Review cadence

- Carlos checks Pipeline & Revenue board
- CMO + Carlos walk all 4 boards; decide one cut, one double-down
- Full retro vs forecast; update scenario position (bear/base/bull)
- Strategic review; reallocate channel budgets; refresh competitive battlecards

11 Funnel Assumptions (Month 12 target)

Stage	Monthly volume	Conversion
Website visitors	40,000	—
Free audit / trial requests	1,200	3%

Stage	Monthly volume	Conversion
Sales-qualified leads (SQL)	180	15%
Platform sign-ups (\$49–\$449)	35/mo	19% of SQL
Retainer closes (\$249+)	13/mo <i>(revised up from 6 to hit MRR target at lower ACV — see business plan §8 strategic note)</i>	7.2% of SQL

12 Brand Guardrails (marketing-facing)

- No public discounts below list. The “Carlos26” launch promo was retired on 2026-04-21.
- No sub-\$500k revenue clients. Below the brand.
- Partners whitelabel the software, not the NetWebMedia agency brand.
- All marketing follows the Gulf-Oil palette (Navy #010F3B / Orange #FF671F / Blue #4A90D9) — see [Brand Book](#).
- Bilingual by default for LATAM — not translation, localization (voice/tone shifts).
- Every claim (“4.2× citations”, “40% cost cut”) ties to a published case study or data study. No manufactured proof.

13 90-Day Success Criteria (roll-up)

UNDER REVIEW AFTER THE 2026-04-21 REPRICING

Keeping the \$32k MRR aim for now, but hitting it requires ~2.2× the original retainer customer count. See business plan strategic note.

Metric	Start (May 4)	End (Jul 31) target
MRR	~\$12k	\$32k <i>(requires ~80 paying retainer clients at new weighted ARPU, up from 38)</i>
Paying clients	~14	80+
LLM citations tracked	<50	400+
Pipeline (\$ coverage 60-day)	\$35k	\$145k
CAC (blended)	~\$3,200	<\$800 <i>(floor dropped with ACVs)</i>
Organic visits/mo	8k	28k
Partners signed	0	25

CLOSING NOTE FROM THE CMO

The plan is front-loaded on content + outbound because those are the only channels where our AI-agent stack creates unfair cost leverage in Q1. Paid media and partners scale later once we have proof assets (case studies + data studies) to fuel them.

Bear-case pivot trigger: If by July 31 we're below \$28k MRR — pause Starter tier acquisition and concentrate demand on Growth (\$999) and Premium (\$2,490) only. Don't wait to pull that lever. *(Threshold reset to the smoothed Lever-B 90-day gate floor on 2026-05-21 — see execution-90day §02.)*
