45	90-DAY REVIEW Reset channel budgets for Q3	Jul 31, 2pm	—	CMO + Carlos + agents	Q3 budget v2 approved, OKRs refreshed

02 90-Day Gate Criteria (Jul 31 review)

To continue on the Base scenario (Lever B, mix shift), we must hit. Ramp assumptions: ~2–4 retainer clients/mo (smooth S-curve from 5 today to 90 at M12); MRR +\$2.5–\$10k/mo depending on tier mix.

Metric	Floor (Base)	Stretch (Bull)	Trigger Bear pivot
MRR	\$38,000	\$50,000	< \$28,000
Paying clients (total)	35	50	< 25

Metric	Floor (Base)	Stretch (Bull)	Trigger Bear pivot
Retainer clients (core)	14	22	< 10
Premium tier clients	4	8	< 2
LLM citations tracked	300+	450+	< 180
Pipeline (60-day \$ coverage)	\$120k	\$180k	< \$80k
CAC (blended)	< \$1,100	< \$850	> \$1,400
CAC (Premium tier)	< \$3,000	< \$2,400	> \$3,800
Partners signed	12	18	< 6

BEAR PIVOT (LEVER B, 2026-05-21 SMOOTHED RAMP)

If MRR < \$28k by Jul 31: Pause fCMO Starter acquisition entirely. Concentrate all sales efforts on fCMO Growth (\$999) + fCMO Premium (\$2,490) + CRM \$449 white-label. Shift strategy to Starter→Growth/Premium upgrade funnel (organic inbound only). Redirect paid acquisition budget to Premium LTV:CAC (10.1x) and Growth (6.5x) only. Rationale: At new pricing, Starter has low volume and 3.1x LTV:CAC; Premium/Growth carry the revenue engine.

03 **Dependencies & Pre-Flight (DO BEFORE KICKOFF)**

- 1. **Conversion Attribution** — the loader is now gated (`window.NWM_META_PIXEL_ID` defaults to empty across all customer-facing pages). Set the real ID before Task 16 (Jun 1) and Task 36 (Jul 13); without it, no conversion attribution on paid spend.
- 2. **Styling** `styles.css` — conflicts with canonical `css/styles.css` (Gulf palette). Delete the stray one or confirm it's template leftover.
- 3. **Coupons** — `coupons` per CEO directive. Disable coupon in Stripe/CRM backend.

4. before May 4 so all agents reference the same source of truth.
5. (\$249 / \$999 / \$2,490) to the live site ([pricing.html](#) , [services.html](#) , [index.html](#) , [partners.html](#) , [pricing-onepager.html](#) , [email-templates/partner-2.html](#)). Engineering-lead handoff.
6. in the business plan §7 (5-year) and §8 (M12 mix) at new ACVs — finance-controller handoff.
